110MI Lite Industrial 4-Port Gigabit VDSL2 Ethernet Extender
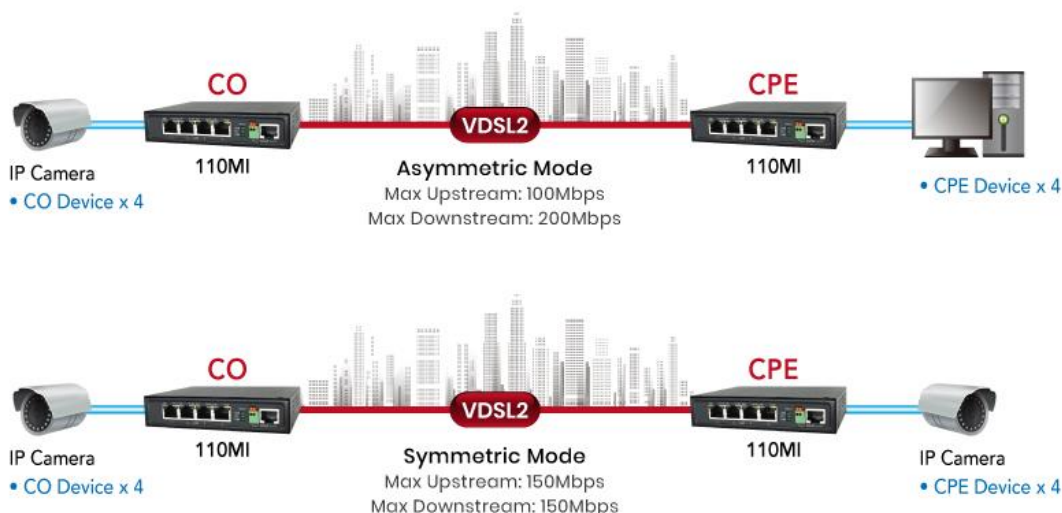

Introduction

PROSCEND 110MI is a **Lite Industrial Grade Ultra-Speed Gigabit Ethernet Copper Extender** that supports a remarkable aggregated bandwidth up to **300 Mbps** (Downstream: 150 Mbps / Upstream: 150 Mbps). It delivers fiber-optic like speeds on existing copper infrastructure, enabling a good alternative in place where fiber is not economical to deploy. The **110MI** is equipped with **four Gigabit Ethernet Ports** (RJ45 connector) and **one VDSL2 port** (RJ45 connector or 2-PIN Terminal Block) in metal enclosure for easy installation and flexible extension. The 8 different profile settings can be selected via DIP switch to suit diverse applications. Symmetric profile can be applied as a standard Ethernet connection while Asymmetric profile can be used for other services like Video streaming or IP surveillance services which require high traffic flow in an uni-direction configuration. The 110MI supports transparent LAN bridging to extend Ethernet services over UTP, Cat 5+ or Coaxial cables. With superior performance in its category, the 110MI is the best high throughput Long Reach Ethernet Extender for service providers to deploy their IP-based networking services to meet various applications in harsh environments.
